

8th January 2020

Dear Parent/Carer,

You may have seen in the media that the Government has launched a scheme to support families who struggle with poor internet connectivity or access. The scheme temporarily increases data allowances for mobile phone users on certain networks. This is so that children can access remote education while their face-to-face education is disrupted. Having access to the internet via a mobile phone would allow students to access Google Classroom and to watch live or recorded lessons.

The scheme is currently available to people who are on the following mobile phone networks:

- Three
- Smarty
- Virgin Mobile
- EE
- Tesco Mobile
- Sky Mobile
- O2

If you think that this scheme would support your child to have access to the online learning resources we are providing then please contact office@stclementshigh.org.uk with the following information:

- The name and tutor group of your child
- The name of the account holder
- The number of the mobile device
- The mobile network of that device (for example Three)

We will submit this information through the government's online service and they will then pass this information on to the network provider. Once the network provider has processed a data increase, they'll send a text message to the account holder.

Please do not hesitate to contact us if you have any questions about this, or any other aspect of remote learning.

Yours faithfully

Mr N K Willingham
Headteacher
